

Getting a vaccine

When getting a vaccine, I will see the nurse.
The vaccine will help to keep me healthy.

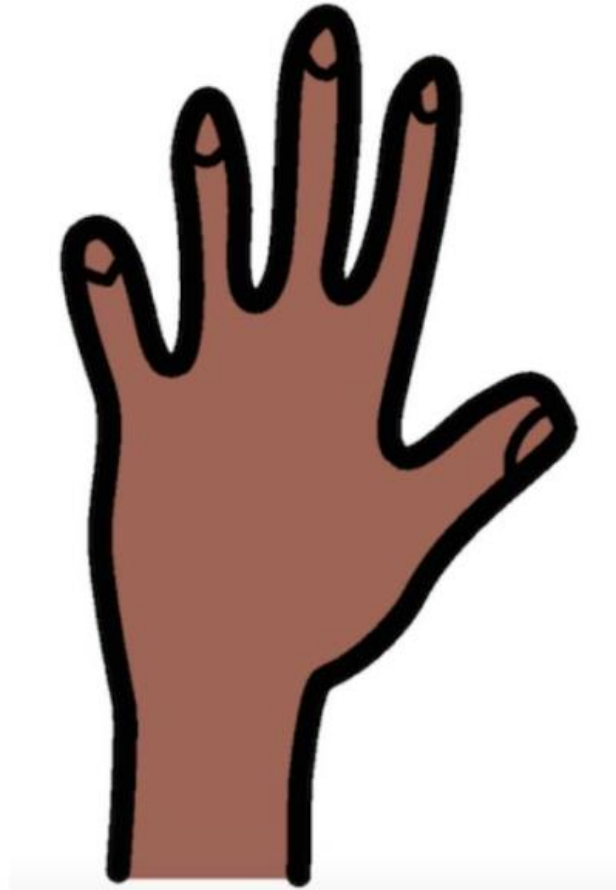

I will roll up my sleeve

The nurse will clean a spot on my arm.
It might feel cold

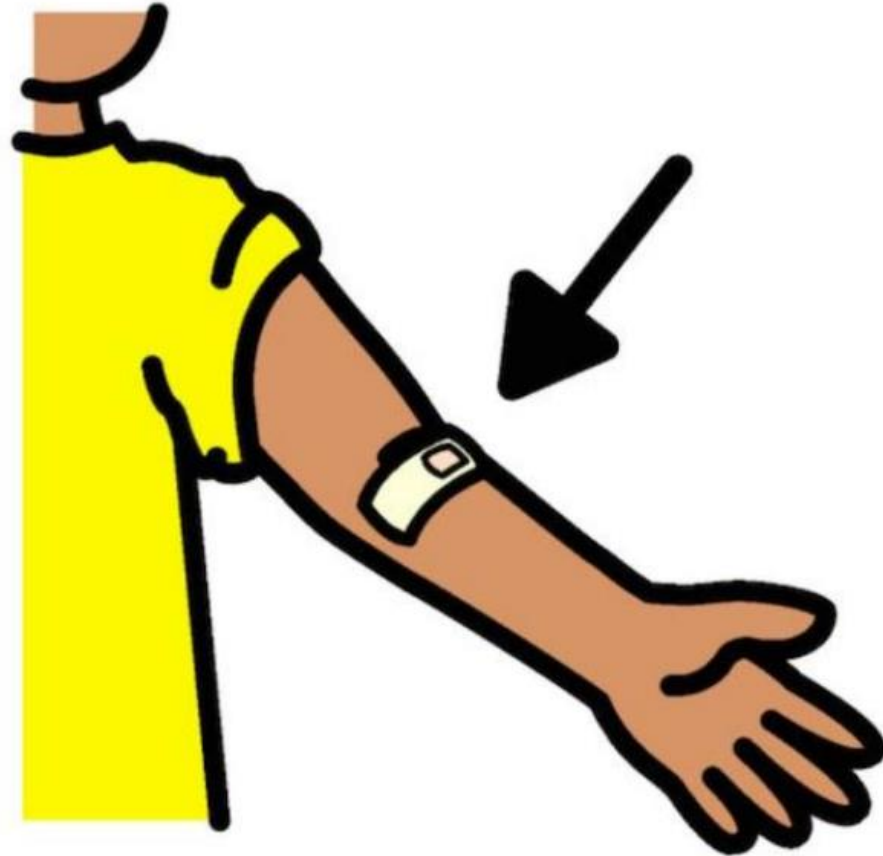

I can choose to look away and ask someone to hold my hand.

The nurse will give me the vaccine. It might feel like a pinch. It is important that I sit still.

The nurse will put a plaster on top of my arm.

Now I can roll down my sleeve and say Bye to the nurse
